Care checklist for case report

- 1. Title—The diagnosis or intervention of primary focus followed by the words "case report". Done
- 2. **Keywords**—2 to 5 key words that identify diagnoses or interventions in this case report (including "case report"). **Done**
- 3. Abstract—(structured or unstructured) Unstructured
 - 3.1. Introduction—What is unique about this case and what does it add to the scientific literature? **Done**
 - 3.2. The patient's main concerns and important clinical findings. **Done**
 - 3.3. The primary diagnoses, interventions, and outcomes. **Done**
 - 3.4. Conclusion—What are one or more "take-away" lessons from this case report? **Done**
- **4. Introduction**—Briefly summarizes why this case is unique and may include medical literature references. **Done**
- 5. Patient information
 - 5.1. De-identified patient specific information. **Privacy maintained.**
 - 5.2. Primary concerns and symptoms of the patient. **Done**
 - 5.3. Medical, family, and psychosocial history including relevant genetic information. **Done**
 - 5.4. Relevant past interventions and their outcomes. **Done**
- **6.** Clinical findings—Describe significant physical examination (PE) and important clinical findings. **Done**

7. Timeline—Historical and current information from this episode of care organized as a timeline (figure or table).

8. Diagnostic assessment

- 8.1. Diagnostic methods (PE, laboratory testing, imaging, surveys). **Done**
- 8.2. Diagnostic challenges. None
- 8.3. Diagnosis (including other diagnoses considered). **Done**
- 8.4. Prognostic characteristics when applicable. Not applicable

9. Therapeutic intervention

- 9.1. Types of therapeutic intervention (pharmacologic, surgical, preventive). **Done**
- 9.2. Administration of therapeutic intervention (dosage, strength, duration). **Done**
- 9.3. Changes in therapeutic interventions with explanations. Not applicable

10. Follow-up and outcomes

- 10.1. Clinician- and patient-assessed outcomes if available. **Done**
- 10.2. Important follow-up diagnostic and other test results. **Done**
- 10.3. Intervention adherence and tolerability. (How was this assessed?)
- 10.4. Adverse and unanticipated events. None

11. Discussion

- 11.1. Strengths and limitations in your approach to this case. **Done**
- 11.2. Discussion of the relevant medical literature. **Done**
- 11.3. The rationale for your conclusions. **Done**
- 12. The primary "take-away" lessons from this case report (without references) in a one paragraph conclusion. Done
- 13. Patient perspective—The patient should share their perspective on the treatment(s) they received. Patient was satisfied with treatment
- 14. Informed consent—The patient should give informed consent. (Provide if requested.) Done
